

# ZESTRON® Easy Bath Control Kit

## Area of Application for the ZESTRON® Easy Bath Control Kit

ZESTRON® Easy Bath Control Kit is a simple-to-use procedure that allows the user to monitor the cleaning agent concentration not only during the process implementation but also at any given point thereafter.

Concentration fluctuations caused by “drag-out” and dilution can therefore be easily monitored, ensuring reliable cleaning results.

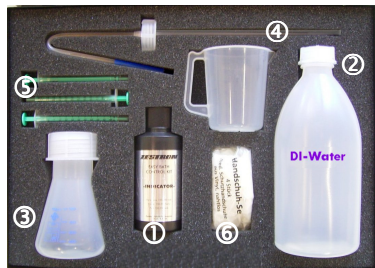

## Advantages of ZESTRON® Easy Bath Control Kit compared to other test methods:

- Quick and easy measurement method to define the cleaning agent concentration in the cleaning bath.
- No special test equipment necessary, therefore
  - no space requirements
  - no investment costs
  - Can be used independently from other devices
- Low costs per test

## ZESTRON® Easy Bath Control Kit was specifically developed for the following aqueous cleaning agents:

- ATRON® AC 200
- ATRON® SP 200
- VIGON® A 300

## The ZESTRON® Easy Bath Control Kit includes the following accessories:

- (1) 100 ml ZESTRON® Easy Bath Control – Indicator (up to 200 measurements)
- (2) DI-water bottle
- (3) 1 Erlenmeyer flask for measurement
- (4) 1 Sampling beaker for taking a sample
- (5) 3 Sampling syringes
- (6) Vinyl gloves (2 pair)
- (7) Instructions for use, including the correlation charts

100 ml refill bottle of the ZESTRON® Easy Bath Control indicator is also available.
